

FUTURE OF MAKING

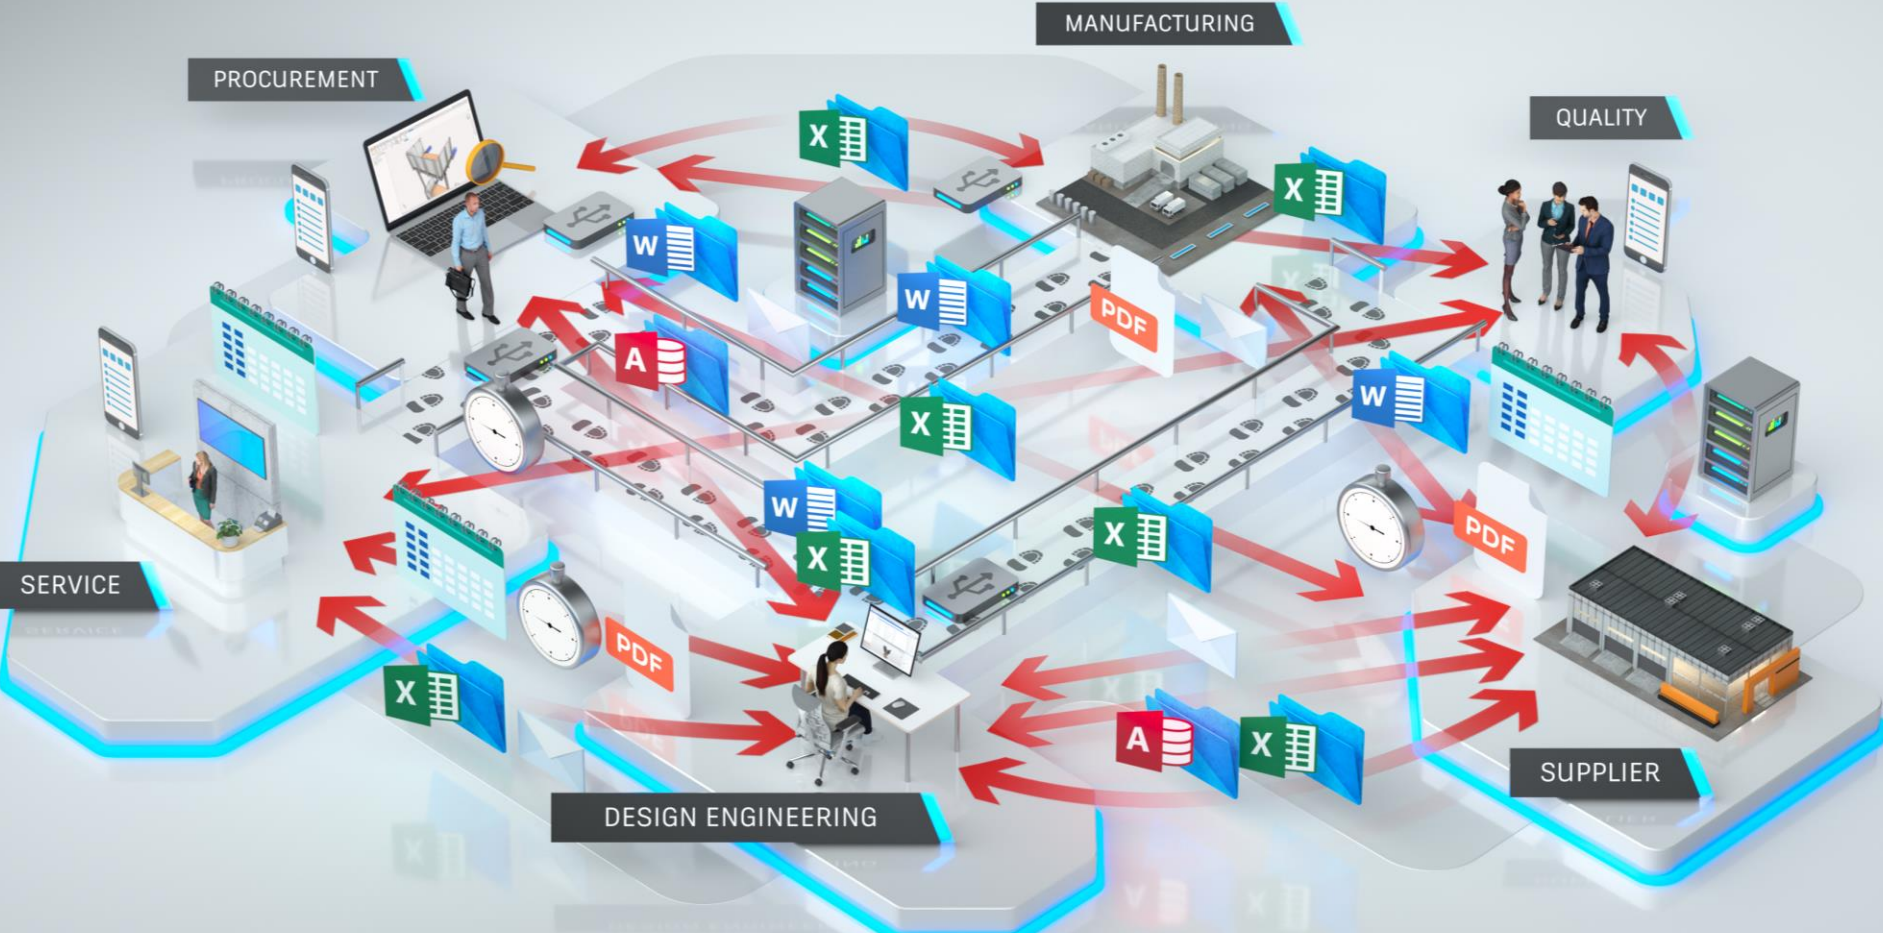

# CONNECTED DATA AND CLOUD COLLABORATION

Jamie Eckmier

Sr. Manager, D&M Thought Leadership | @eckmier

# IT'S TIME FOR A CHANGE

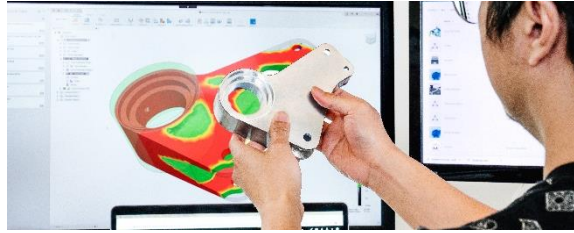

# CONNECTION IS THE KEY

## EFFECTIVE COLLABORATION

Single source data enables unprecedented collaboration from concept to manufacturing.

## EFFICIENT PROCESSES

Manufacturing-aware design software dramatically shortens your go to market time.

## ACTIONABLE INSIGHT

Data enables you to find bottlenecks and to leverage machine learning or automation.

## BREAKING DOWN DATA SILOS

Provide better products at lower costs with more efficiency thanks to more informed decision making.

# NOW MORE THAN EVER

Business continuity requires collaboration solutions that connect organizations, their suppliers, and their customers.

# DATA AT THE CENTER

Enable engineering collaboration and improve business efficiency through design and manufacturing process automation.

CONVERGENCE OF DESIGN & MANUFACTURING

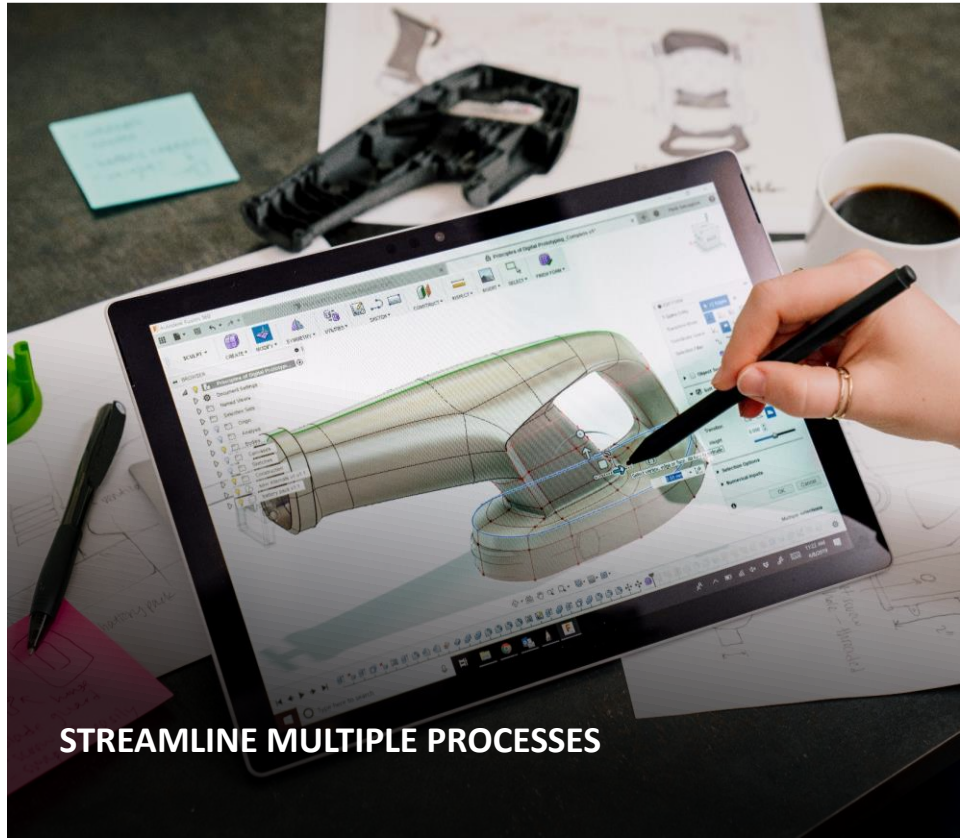

# CONNECTED DATA, PEOPLE, AND PROCESS

Make the right data available to the right people at the right time.

**COLLABORATE FROM A SINGLE DATA SOURCE**

**STREAMLINE MULTIPLE PROCESSES**

# CONNECTED DATA, PEOPLE, AND PROCESSES

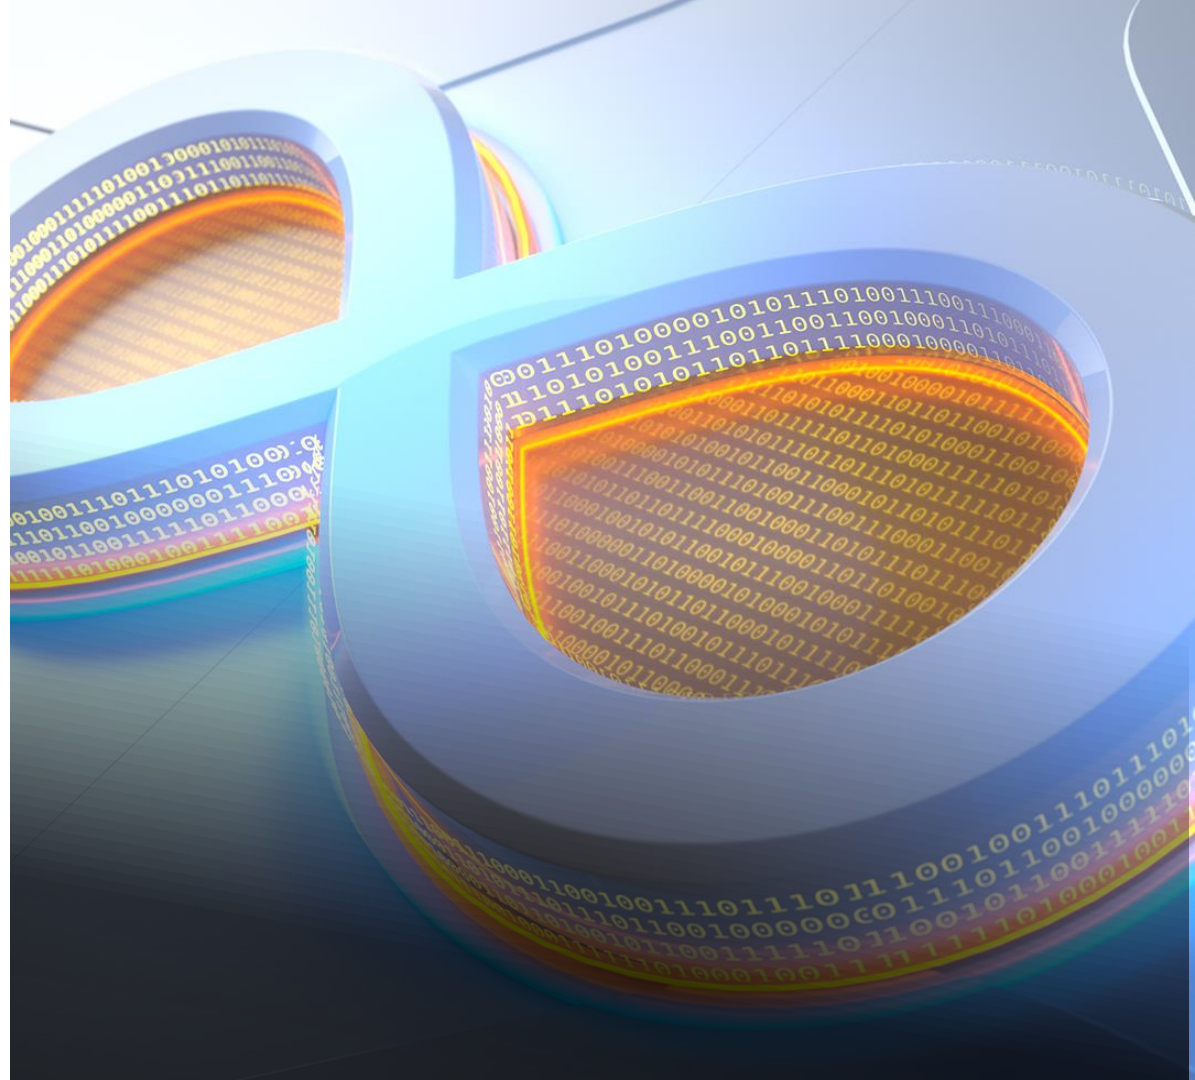

Extend the value of your data beyond the engineering department.

# UNITING PRODUCT DATA AND LIFECYCLE MANAGEMENT

Accelerate development by connecting your product and process data. Keep everyone informed and up-to-date by connecting the desktop to the cloud.

# A LEADER IN CLOUD SOLUTIONS

Keep critical development processes moving by connecting your teams with the right data no matter where they are.

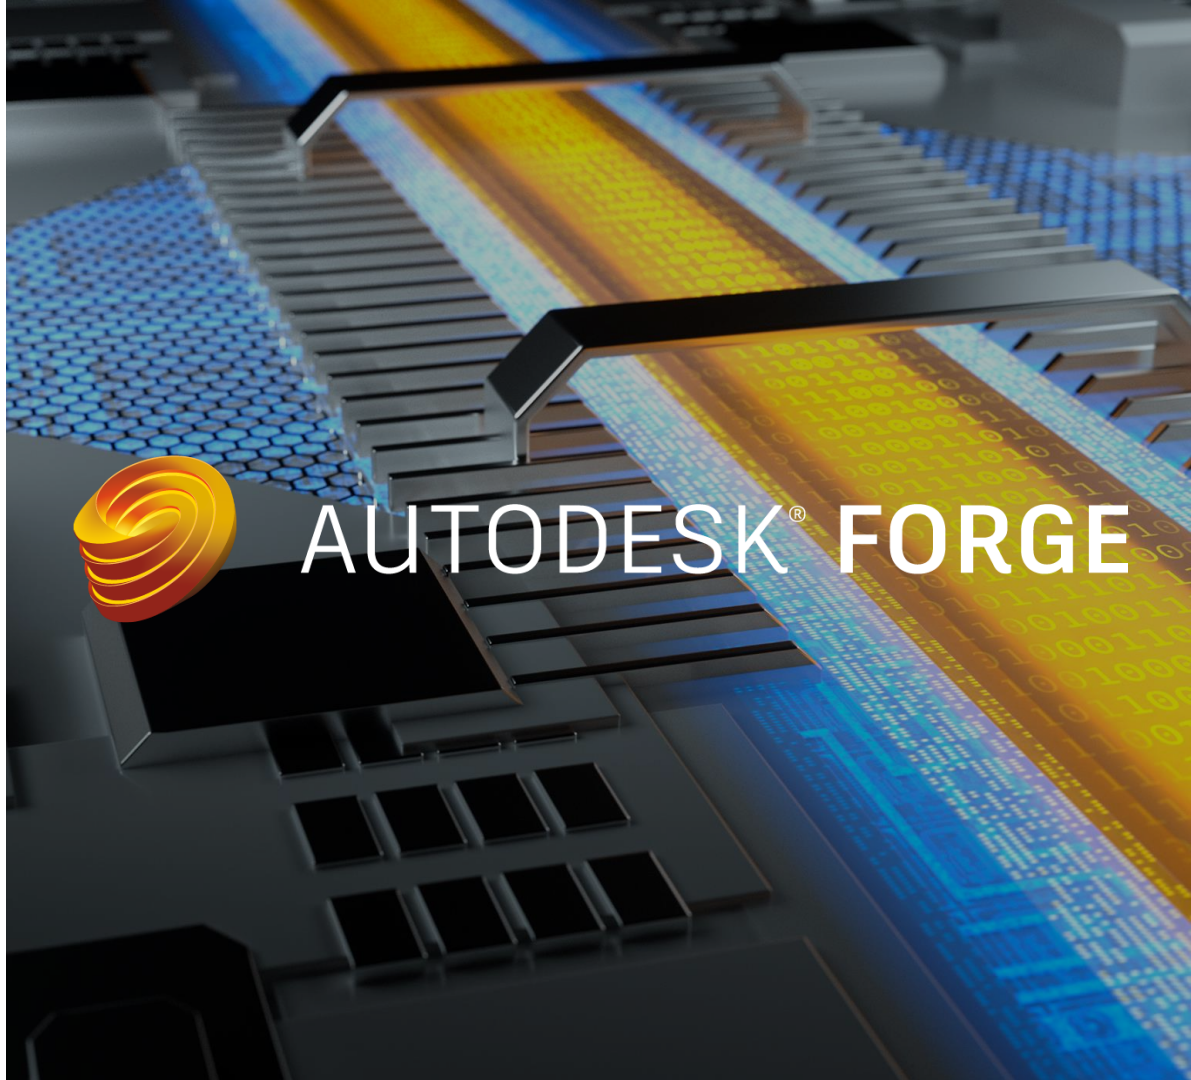

# COMMON DATA EXPERIENCE

The Forge platform helps you unlock the power of your data. So, you can connect teams and build new services to address today's connected customer.
